Chemical & Metallurgical Engineering

Volume XXXVI

From January to December

1929

Published monthly by
McGRAW-HILL PUBLISHING COMPANY, INC.
NEW YORK

HENRY M. BATTERS
Market Editor
JAMES A. LEE
Assistant Editor
THEODORE R. OLIVE
Assistant Editor

CHEMICAL & METALLURGICAL ENGINEERING

R. S. McBRIDE
Washington
PAUL D. V. MANNING
San Francisco
Assistant Editors

M. A. WILLIAMSON
Publishing Director

S. D. KIRKPATRICK, *Editor*

Chemical & Metallurgical Engineering is the successor to *Metallurgical & Chemical Engineering*, which, in turn, was a consolidation of *Electrochemcal & Metallurgical Industry* and *Iron & Steel Magazine*. The magazine was originally founded as *Electrochemical Industry*.

McGraw-Hill Publishing Company, Inc., New York City

Volume XXXVI

January to December 1929

GENERAL ALPHABETICAL INDEX

Pages

January ..... 1 to 64
February ..... 65 to 128
March ..... 129 to 192
April ..... 193 to 264
May ..... 265 to 328
June ..... 329 to 392
July ..... 393 to 456
August ..... 457 to 520
September ..... 522 to 584
October ..... 586 to 648
November ..... 649 to 712
December ..... 713 to 776

A

Abbott laboratories, North Chicago, Ill. Lee 132
Absorption control 257
Acetylene generator (E. N.) 695
Accounting, Provisions for patent obsolescence in chemical industry. Byerly. 92
Accumulator effective in supplying process steam 489
Accumulators, Steam (S.) 752
Acetate of lime has active call 54
Acetic acid corrosion resistance, Huey ... 574
——Materials for handling. Cooper 749
——Production, solvent extraction obviates waste in. Krase 657
——Synthetic, on market 45, 48
Acid: See under specific heading.
Acids, Heavy, demonstrate important process refinements 27
Acid-proof cement (E. N.) 756
Adhesion between solids specific in nature. Rushton 144
Adipic acid produced by new process in Germany 117
Adsorption of solids from air (S) 624
Advertising to help sell your technical product. Wadsworth 25
Air:
——And gas handling control 254
——Compressed (S) 433
——Conditioning, Fundamental principles in. Bulkeley 734
——Craft improved by chemical engineering. Walker 348
——Filter, Low resistance (E. N.) 108
——Heaters, Oval tube (E. N.) 108
——Separator, Centrifugal (E. N.) 106
Alabama's chemical industry 655
Alcohol, estimating heat consumed in batch rectification. Houghland 89
Alcohol, Ethyl, industry improves distillation processes. Reich 716
Alcohol producer, Another threat at (Edit.) 458
Alkali plant, New, for Northwest 88
Alkalies, Heavy contract buying in 47
Alkaline corrosion resistance. Huey 574
Alkaline corrosives, Materials for handling. Cooper 749
Alloys:
——For chemical construction ..... Sept.
——For H_2SO_4 (E. N.) 499
——New, withstand HCl. Field 542
——Pipe (E. N.) 696
——Recommendations require users' cooperation. McKay 23
——Shown at chemical exposition (E. N.) 305
Alum corrosion resistance. Huey 575
Aluminum:
——Castings, simplified welding of (P. N.) 435
——Chloride: its price and purity (c.) Haertel 687
——Chloride, who will profit from cheap? (Edit.) 394
——Chloride, cheap, after 15 years' development. McAfee 422
——Chloride, The case for technical (c.). Groggins 742
——Coating with lime (P. N.). McCulloch 753
——Equipment, action of various chemicals on. Faragher 544
Aluminum, continued:
——Production in its present aspects. Edwards and Mason 674
——Produced by acid and electrothermal processes. Edwards and Mason ... 730
——Solder (E. N.) 109
——Varied applications in industry. Faragher 543
American Chemical Society meeting, Columbus, reflects chemical progress. Staff 279
American Electrochemical Society discusses developments at Toronto meeting. Staff 337
American Electrochemical Society meeting at Pittsburgh. Staff 600
American Enka Corporation, Asheville, N. C. 663
American Gas Association convention at Atlantic City reports on engineering. Staff 679
American Gas Association sessions reveal new trends. McBride 359
American Institute of Chemical Engineers:
——Becomes of age (Edit.) 393
——Bound for Asheville (Edit.) 651
——Cellulose technology discussed at Asheville meeting. Staff 726
——Offers opportunity for professional service (Edit.) 587
——Reports engineering achievements at Philadelphia meeting. Staff 399
American Institute of Mining and Metallurgical Engineers meeting features corrosion 154
American Potash & Chemical Corporation, Searles Lake, Manning 268
American Welding Society studies process problems. Staff 294
American Trade Association executives set standards (Edit.) 586
American Welding Society discusses nondestructive tests 600
Amination by ammonolysis—a unit chemical engineering process. Groggins .. 273
Ammonia oxidation in chamber plants. Olive 614
——Products show steady course 56
——Synthesis, arc process giving way to. Aubert 481
Arkansas' chemical industry 656
Asbestos compounded to meet varied requirements 563
Asheville, N. C., center of chemical industries 660
Asphalt emulsion has many uses in chemical plant. Kirschbraun 477
Asphalt, Heating electrically. Scarbrough. 304
Associations, Export, facilitate foreign trade 26

B

Backstop, Automatic (E. N.) 172
Ball mill (E. N.) 628
Ball milling, Heat generation in 72
Bearing, Self-sealed (E. N.) 757
Belts, Line-start motors require larger (P. N.). Hoskins 435
Bentonite for lead pencils 357
Benzol specification modifications (Edit.). 587
Bichromate of soda finds larger market ... 47
Bleachery of Sayles-Biltmore 663
Book Reviews:
——Accounting and cost finding for chemical industries. G. A. Prochazka, Jr. 166
——Allen's commercial organic analysis: alkaloids 432
——American soap maker's guide. I. V. S. Stanislaus and P. B. Meerbott 168
——Annual survey of American chemistry, III. C. J. West 168
——Anorganische und organische Entfärbungsmittel. L. Singer 432
Book Reviews, continued:
——Applied organic analysis. W. F. Hillebrand and G. E. F. Lundell 744
——Arc welding: Lincoln prize papers ... 690
——Art of rapid reading. Walter B. Pitkin 746
——Artificial silk. Franz Reinthaler, F. M. Rowe 622
——Bibliography of metallic corrosion, W. H. J. Vernon 366
——Bibliography of pulp and paper making, 1900-1928. Clarence J. West. 494
——Blast furnace practice. Fred Clements 495
——Catalytic processes in applied chemistry. T. P. Hilditch 622
——Chemical dictionary. Ingo W. D. Hackh 744
——Chemical publications. M. G. Mellon. 99
——Chemische Nomogramme. Otto Liesche 300
——Chemische Fachwörterbücher. A. W. Mayer 300
——Choice of an occupation 432
——Colloid chemistry, Vol. II. J. Alexander 167
——Colloidal salts. Harry B. Weiser 494
——Comprehensive treatise on inorganic and theoretical chemistry, IX. J. W. Mellor 300
——Darstellung metallorganischer Verbindungen. E. Klarmann 432
——Das Buch der grossen Chemiker. Günther Bugge 689
——Determination of hydrogen ions. W. M. Clark 97
——Die Künstlichen Harze. J. Scheiber and K. Sändig 688
——Discovery of rare gases. M. W. Travers 430
——Elementary foundry technology. L. A. Hartley 97
——English and science. Philip B. McDonald 745
——Enzyme actions and properties. E. Waldschmidt-Leitz and R. P. Walton 98
——Farm products in industry. G. M. Rommel 299
——50 Jahre der Kältetechnik 622
——Fortschritte in der Kali-Industrie. C. Hermann 494
——Forty years with General Electric. J. T. Broderick 690
——Gas chemists handbook 432
——Glycerol and the glycols. J. W. Lawrie 166
——Handbook of chemistry and physics. C. D. Hodgman & M. A. Lange 168
——Handbook of refrigerating engineering. W. R. Woolrich 494
——Hydro-extractors: their use and practice 746
——Identification and properties of common elements. J. E. Belcher and J. C. Colbert 366
——Impurities in metals. C. J. Smithells 166
——Industrial carbon. C. L. Mantell 299
——Industrial chemistry. E. M. Riegel ... 99
——Industrial development of Searles Lake brines. J. E. Teeple 430
——Industrial economics. Dexter S. Kimball 744
——Inorganic chemical technology. W. L. Badger and E. M. Baker 299
——Laboratory experiments in organic chemistry. R. Adams & J. R. Johnson 98
——La grande oeuvre de la chimie 689
——Manufacture of pulp and paper, IV. J. N. Stephenson 97
——Manufacture of pulp and paper, V. J. N. Stephenson 431
——Materials handbook. George S. Brady 366
——Mechanochemistry and the colloid mill. Pierce M. Travis 745
——Methods in non-ferrous metallurgical analysis. R. Keffer, C. L. McNeil and A. Butts 100
——Mineral raw materials. J. W. Furness, L. M. Jones, and F. H. Blumenthal 431

NOTES—(c) Comment; (E. N.) Equipment News; (P. N.) Plant Notebook; (S) Synopsis or abstract.

E. Eng. Lib
Wilson

Book Reviews, continued:
——Nobel: Dynamite and Peace. Sohlman-Schück: Lunn 365
——Oxy-acetylene welder's handbook 690
——Petroleum facts and figures 622
——Photomicrographs of iron and steel. E. L. Reed 100
——Polar molecules. P. Debye 366
——Popular research narratives, 3 689
——Principles and applications of electrochemistry. H. J. Creighton 745
——The principles of metallurgy. John L. Bray 495
——Problems der deutschen chemischen industrie. Peter Waller 689
——Pyrolysis of carbon compounds. C. D. Hurd 431
——Pulp and paper industry of Pacific Northwest. H. K. Benson 366
——Reading list on paper-making materials. C. J. West 98
——Recent economic changes in the United States 365
——Salts, acids bases: electrolytes; stereochemistry. Paul Walden 366
——Second International Coal Conference : proceedings 432
——Starch, its chemistry, technology and uses. L. Eynon and J. H. Lane 688
——Steenkool: haar ontstaan vervanging en veredeling. J. J. Bootsgezel 366
——Storage batteries. M. Arendt 99
——Study of chromium plating. R. Schneidewind 100
——The Sales Engineer. Gilbert Rigg 18
——Werkstoffe für den Bau chemischer Apparate. A. Fürth 168
Borax exports reach record figures 49
Borax production larger last year. Manning 47
Bradley-Osborne controller governs suspension flow and dilution 362
Brick and cement, chemical, afford long-time protection. Webb 565
Business better and more profits (Edit.) 458
Business looks to science and research. (Edit.) 267
Business self-regulation requires team work. (Edit.) 65

C

Calcium hypochlorite produced by new method. Gage 295
Calcium sulphate removal from equipment 733
Calorimeters 250
Carbon dioxide. How does it behave under pressure? Krase and Goodman 162
Carbonization, Low-temperature (S.) 691
Carolinas' chemical industry 634
Cast alloy pipe (E.N.) 500
Castings, "Elverite" chilled (E.N.) 502
Catalysis, contact (S.) 301
Catalysis, heterogeneous (S.) 623
Catalysts discussed at A.C.S. meeting 280
Cellulose acetate plant of Tennessee Eastman Corp. 671
Cellulose nitrate and acetate for equipping plant 569
Cellulose technology discussed at A.I.Ch.E. meeting. Staff 726
Cement industry featured by mechanical process control. Norvig 214
Centrifuge for high temperatures (S.) 101
Centrifuge, horizontal (E.N.) 628
Centrifuging viscose (S.) 433
Ceramic coatings for oil-cracking corrosion. Morrell and Faragher 596
Ceramic materials, wide variety finds application. Brown 562
Chamber of Commerce holds annual meeting 312
Changes that foreshadow industries (Edit.) 329
Champion Fibre Company, Canton, N. C. .. 661
Charcoal, active, for scrubbing gases 599
Charts:
——Bulkely psychrometric chart 735
——Foreign trade in chemicals 38
——Materials of construction for chemical engineering industries. Sept.
——Power sources, 1918-1927 169
——Prices and output in 1928 57
——Pressure tank calculations. Wood 738
——Russian Five-Year Plan 724
——Temperature control devices classified 238
——Value of product added by manufacture. Ladd 83
Chemical:
——*Chem. & Met's.* estimates of production of basic 57
——Commerce, Crossroads of (Edit.) 651
——Engineers, A new job for (Edit.) 331
——Engineers can advance profession by public speaking. Collins 487
——Engineers, How industry absorbs college crop of. Lee 415
——Foreign trade in (Chart) 38
——Industry: real index of profits (Edit.) 713
——Large domestic production last year of 58
——Manufacturers, Profitable marketing methods for. Concannon 485
——Price as factor in marketing. Rand .. 6
——Trade leaders report optimistic outlook 772
——Warfare Service headed by Gilchrist .. 259
Chemistry & You: How a little periodical serves a consultant's public. Maas. 165
Chile nitrate production increase greater than consumption 41
Chlorine carrier supplied by new product. Gage 295
——Containers, Fusible metal safety plugs in 75
——Liquid, Production and prices of. Baldwin 52
Chromium:
——Acid trade sees new producers 46
——Cast steel flue becomes brittle. Davis. 534
——Iron and steels for chemical industry. Mitchell 532
——Nickel steels for chemical engineers. Mathews 528
——Plated ball mill chips under impact. Gross & Zimmerley 617
——Plating health hazards eliminated. Bloomfield and Blum 351
——Steels serve nitro-cellulose manufacturer. McKnight 530
Clay, Abrasive action on dies of plastic 617
Cleveland Clinic disaster was lesson for chemical industry 334
Cleveland clinic deaths, Further findings (C.) MacLaurin 493
Coal:
——Byproducts production and values in 1927 43
——Hot weather jokes about (Edit.) 459
——Hydrogenation results, British 141
——Powdered (S.) 301
——Processing for power generating, will it pay? Knapp & McMichael 281
——Products have record-breaking production in 1928. McBride 42
——Products plant, instruments in a. Meredith 224
——Tar chemicals production gained slowly. Church 50
Coatings, metal (S.) 496
Coke & Coking:
——As direct source of electricity (C.) Thompson 686
——Industry's migration. Cuno 418
——Low-temperature at new K.S.G. plant. McBride 233
——Plant, pure iron in 572
——Technical advances (S.) 102
——Time-temperature relation in (P. N.). McBride 753
College crop of chemical engineers, How industry absorbs. Lee 415
Color analyzers (E. N.) 758
Columbium introduced (E.N.) 501
Compressed air, eliminating shortage of (E.N.) Ahr 369
Compressors (E.N.) 694
Compressors, Sulzer (S.) 623
Concentrator, intensive (E.N.) 437
Concrete construction (S.) 751
Concrete, portland cement special treatments increase resistance of. Mitchell 564
Concrete production (S.) 367
Concrete slabs, Precast (E. N.) 756
Construction materials, What chemical engineer demands of. Huey 522
Consulting business, are equipment manufacturers in? Browne 24
Consulting business, are equipment manufacturers (C.) Sparks, Kothny, Schmidt 297
Containers with adjustable dimensions (S.) 101
Control automatic, to maintain uniform density of suspensions 362
Control:
——Automatic, in unit processes 253
——Beet sugar industry applies continuous automatic. Darby 211
——Cement manufacture featured by mechanical. Norvig 214
——Caustic soda production with automatic electrolytic. James 234
——Co-ordinating, in industry 196
——Electrical, developed in making radio tubes. Shackelford 228
——Electrical gas analysis for continuous processing. Schmid 230
——Harmonizing functions in new plant Harney 196
——In chemical engineering industries 194
——Instruments at Power Show (E. N.) .. 754
——Instruments that simplify. (Symposium) 237
——Natural gasoline recovery, Automatic pressure regulation aids in. Thomas 221
——Of human factor for accident prevention. Kershan 203
——Of quality in operations of National Carbon Company. Gillingham 200
——Of process with gas (S.) 752
——On lehr fired with producer gas 595
——Process 193
——Pulp and paper industry served by diversified. Macdonald 217
——Rubber industry maintains product uniformity. Moorhouse 208
——Water gas made in completely automatic plant. McBride 205
Copper and alloys, How chemical industry applies. Bassett 549
Corning Glass Works at Kingsport, Tenn... 672
Cornstalks and straw, Can paper be made profitably from? 480
Controllers for temperature 241
Conveyor cleaner, fluted (E.N.) 501
——Shaking-chute (E.N.) 629
——System, Duplex (E.N.) 107
Corrosion:
——And depolarization (S.) 623
——Bibliography 750
——Construction materials for handling agents of. Cooper 747
——Discussed at A.E.S. meeting. Staff ... 601
——From HCL combatted in chemical processing. Schein 355
——In dyeing plant (S.) 751
——In oil cracking, Ceramic coatings for. Morrell and Faragher 596
——Lead coil (S.) 691
——New materials to resist 30
——Pipe (S.) 101
——Pipe (S.) 433
Corrosion, continued:
——Plays lively part in A.E.S. meeting. Staff 338
——Problems: What can we use? Huey . 573
——Protection by covering (S.) 368
——Resistant materials 521-576
——Soil survey cuts cost in preventing pipe line. W. T. Smith 137
——Surface films protect metals against. Speller 85
——Symposium features A.I.M.M.E. meeting. Staff 154
——Tester (S.) 101
Corrugated alloy sheets (E.N.) 490
Cost estimation in commercial research. Tyler 3
Cost trends, Production factors reflected in. Dunn and Watson 407
Cracking processes (S.) 301
Cracking processes, improved fractionation for. Keyes 78
Cranes, gasoline locomotive (E.N.) 173
Crane, new electric 172
"Creep limit" alters technique in large tank design. Wood 610
Creep of electric furnace alloys (S.) 692
Creep testing of metals. Kirkpatrick 526

D

Dampers, Watch your (P.N.) 171
Davison Chemical Company's ammonia oxidation. Olive 614
Deconcentrators (S.) 367
Detector, portable, developed for combustible gases. Mabbs and Rowland ... 490
Diaphragms, electrolytic (S.) 433
Disintegrating devices at Show (E.N.) ... 306
——Equipment reviewed 34
——Control 257
Distillation control 256
——Columns, Glass plates prolong life in. Backhaus 429
——Equipment for petroleum refining. Piroomov and Loomis 472
——Processes, Ethyl alcohol industry improves. Reich 716
——Studies reported at A. I. Ch. E. Staff 400
Distribution geographically of chemical consuming industries in U. S. 9, 10
——Of heavy chemicals, Chem. & Met's. annual estimates 31
——Transportation as a factor in 10
Drier, Calculating for lignite with psychrometric chart. Lavine and Sutherland 425
——Direct-heat (E.N.) 627
——City-gas (E.N.) 108
——Seen at Show (E.N.) 306
——Rapid (S.) 367
Drives for chemical plant equipment. Staniar 604
Drying (S.) 496
——And cooling air (S.) 301
——And mixing viscous liquid in 80 per cent less time. Jessup 413
——Equipment reviewed 34
——In unit processes 253
——Multi-stage (S.) 367
Dump trucks (E.N.) 501
DuPont Repauno plant 460, 463
Dyestuffs corrosion resistance 575

E

Eastman Kodak Corporation at Kingsport, Tenn. 396
Economic changes in U. S. (Edit.) 330
Editorials:
——An opportunity—not a threat 265
——Another threat at alcohol producer .. 458
——Asheville, Plan to go to 651
——Avoiding dangerous hysteria in forecasting fertilizer sales 130
——Better business and more profits 458
——Better no tariff than political claptrap 329
——Broader perspective on tariff matters 129
——Business looks to science and research 267
——Chemical changes that foreshadow industries 320
——Chemical commerce, Crossroads of .. 651
——Chemical engineering becomes of age 393
——Chemical industry and new tariff 266
